

QUATTRO  
PORTS

## HEALTH AND SAFETY POLICY

**Safety First** is paramount to Quattro Ports. Our employees and contractors are our most important asset and their families **depend on them** going home safely at the end of their working day or shift. To achieve our safety goals, Quattro Ports will:

- Establish, review and continuously improve health, safety and environmental objectives and targets.
- Maintain safety and environmental management systems and processes based on sound risk management principles.
- Adhere to relevant legislation, regulation and codes of practice.
- Provide a platform for our workforce, our stakeholders and our community to partner in the health and safety journey through effective consultation and communication and the sharing of knowledge and ideas.
- Ensure all incidents and near misses are reported to prevent recurrence.
- Implement effective injury management and return to work programs to facilitate the early, safe and durable recommencement of normal duties for all injured workers.
- Communicate our health and safety priorities and plans and ensure all workers are trained in and have the effective tools to contribute to a safe, incident free workplace.

Tony Day

Chairman - Quattro Ports
